

Walter

March 18, 2026

Walter was found on the side of the road. The vet estimated him to be 15-16 and He was blind and deaf with severely decayed teeth and also, dementia . He was the ultimate survivor. He was with me for 6 months and I gave him all the attention and love I could possibly heap on him, but his little body was just worn out and he let me know he had enough and wanted to rest. My heart is broken for all he endured, for all the neglect and yet, he made it to me for what I am hoping was 6 months of peace and comfort and I hope he felt loved. He was precious.
